

# Tork Universal Hand Towel C Fold

Couleur: Blanc

## avantage

- Système traditionnel
- Essuie-mains extra-long
- Pas de contact avec le distributeur

## caractéristiques des produits

article	système	Epaisseurs	Impression	Gaufrage	Couleur
290248	H3 - C-fold and ZZ-fold system	1	Non	Oui	Blanc

## données d'expédition

### unité de vente

EAN	7310791057507
pièces	160
matériel	Banderole
hauteur	100 mm
largeur	100 mm
longueur	250 mm
volume	2.5 dm3
poids net	564 g
poids brut	571 g

### unité de transport

EAN	7310791057514
pièces	3200
unités de vente	20
matériel	Carton
hauteur	262 mm
largeur	401 mm
longueur	596 mm
volume	62.6 dm3
poids net	11.28 kg
poids brut	11.96 kg

### palette

EAN	7322540197570
pièces	89600
unités de vente	560
hauteur	1984 mm
largeur	800 mm
longueur	1200 mm
volume	1.8 m3
poids net	315.95 kg
poids brut	334.96 kg

# Tork Universal Hand Towel C Fold

Couleur: Blanc

## environnement

### Content

Recycled fibres, Chemicals

### Material

**Recycled fibres** Recovered paper can be produced both from collected newsprint, magazines and office waste. The paper is washed with water and treated with chemicals under high temperature and then filtered. Different fibres demand different processes and this determines the end product properties, and makes the fibre type (recovered or virgin) less important. The environmental benefits and economic feasibility of recovered paper as a raw material source depend on its availability, transport distance and the quality of the collected material. **Bleaching of fibres** Bleaching is a cleaning process of the fibres and the aim is to achieve a bright pulp, but also to get a certain purity of the fibre in order to achieve the demands for hygiene products and in some cases to meet the requirements for food safety. There are different methods used today for bleaching ECF (elementary chlorine free) where chlorine dioxide is used, and TCF (totally chlorine free) where ozone, oxygen and hydrogen peroxide is used.

### Chemicals

The chemicals used in the process as well as the functional chemicals are assessed from an environmental, occupational health and safety and product safety point of view. The used functional chemicals are: Wet strength agent, Dry strength agent, Dye = if coloured, Fixing agents, Fluorescent whitening agent, Glue = if used. The process chemicals are: Antipitch, Protection agent, Yankee coating, Defoamer, Dispersing agents and surfactants, pH and charge control, Retention aids, Broke treatment chemicals, Drainage aid.

### Packaging

Fulfilment of Packaging and Packaging Waste Directive (94/62/EC): Yes. Environmental label = Ecolabel. This product does not have any ecolabel.

Date of issue 2007-11-06

Revision date 2009-07-23

### Production

This product is produced at Kostheim mill, Germany, and certified according to ISO 9001:2000, ISO 14001 and EMAS.

### Destruction

This product is mainly used for personal hygiene and can be collected together with household waste.
